### OUTLINE

Singapore has become a liveable and sustainable city in the last four to five decades even though its density has tripled as its population grew from less than 2 million to 5.6 million today. This was achieved in spite of very limited land as a small island. Land prices have soared and the real estate industry prospered. The industry has contributed significantly to the building of the city, thanks to good governance and integrated planning, which have created a well regulated, but transparent and healthy property market. Orchard Road, The Central Business district, and other sub centres in Tampines and Paya Lebar have been built largely by the private sector. How will this successful collaboration change in the years ahead as the city faces new challenges like technological disruption, climate change and an ageing population?

### ABOUT THE SPEAKER

Mr Khoo Teng Chye is currently the Executive Director for the Centre for Liveable Cities, Ministry of National Development (MND), Singapore. He was formerly the Chief Executive of PUB, Singapore’s National Water Agency, President and Chief Executive Officer of Mapletree Investments and Managing Director (Special Projects) of Temasek Holdings, Chief Executive Officer/Group President of PSA Corporation and Chief Executive Officer/Chief Planner at the Urban Redevelopment Authority (URA) of Singapore. He sits on the Boards of Temasek Foundation Ecosperity, Temasek Foundation Connects, National University Health System, and the Institute of Real Estate and Urban Studies and Tropical Marine Science Institute of the National University of Singapore (NUS). He is also on the Advisory Panel of NUS Deltas, and the Development Projects Advisory Panel set up by the Ministry of Finance, Singapore. He is a member of the Advisory Committee to the Chief Minister for the formation of the New Capital for Andhra Pradesh, India. He is also an Adjunct Professor at the School of Civil and Environmental Engineering, National Technological University, and at the Lee Kuan Yew School of Public Policy, NUS.

He is Senior Fellow of the URA Academy, Fellow of the Institution of Engineers, Chairman of Urban Land Institute (ULI), Singapore, and a ULI Global Governing Trustee. Mr Khoo was a President-cum-Colombo Plan Scholar and graduated with First Class Honours in Civil Engineering from Monash University, Australia. He also holds a Master of Science in Construction Engineering from NUS and attended the Advanced Management Programme at Harvard Business School. He was awarded the Public Administration (Gold) in 1996 and the Public Administration (Silver) in 1987 by the Singapore government. He was also conferred the Meritorious Service Award by the National Trade Union Congress in 2008.
